**Subject:** Re: Revised Identification and Evaluation Stipulation from 2/17/04 Teleconference

Andrea: Thanks for your prompt response. As I mentioned on yesterday's teleconference before we adjourned, the ACHP fully understands the challenges that have been placed on the TWG drafting group in responding to the February 19th deadline for submitting recommended language to FCC. In our submission to FCC, we will advise them that industry will probably share additional comments as the draft PA is under review by the Commissioners. Likewise, I suspect that NCSHPO and NATHPO and USET will also be vetting the proposed revisions with their membership during the next week or so, and also will submit comments.

RECEIVED

FEB 20 2004

U.S. National Science Foundation  
Office of the Secretary

We are gratified that we were able to provide the opportunity for stakeholders to collaborate further regarding the final version of the Nationwide FCC PA. This collaboration has been invaluable and will ultimately ensure the success of the PA.

Charlene

>While I appreciate the deadline that we are working under, unfortunately I cannot provide a definitive response from CTIA at this time. As you know, the Identification and Evaluation provisions are very important to my members. It is imperative that they have an opportunity to review the recent revisions and determine whether they are acceptable. I do not want to mislead you or the ACHP Tower Working Group Committee in thinking that CTIA members find these revisions acceptable. I will be out of town the rest of the week in meetings, but will get back to you as soon as I can with additional feedback from my members. I would appreciate it if you could note in your transmittal to the FCC that the Revised Identification and Evaluation Stipulation document is subject to further comments and edits from CTIA.
